

Yeast for structured, full-bodied and deep-coloured red wines

Product description

Oenoferm® Structure is a dried, pure, cultivated yeast for producing structured, smooth wines with pronounced tannins. The existing tannin structure is smoothly incorporated into the wine's overall structure.

Fermentation temperature	18 - 28 °C
Aroma profile	Nut, berry and cherry aromas
Other benefits	High alcohol tolerance
	High aging potential
	Polyphenol stabilisation
Recommended grape	Dornfelder
varieties	Cabernet sauvignon
	St Laurent
	Shiraz
	Blauer Zweigelt
	Blaufränkisch (Lemberger)
	Merlot
Tip	For maturation in wooden barrels and barriques

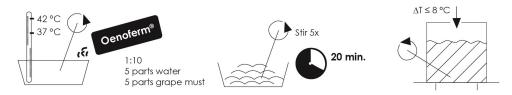

Permitted according to EU Commission Regulation no. 934/2019. User must check compliance with national regulations. Laboratory tested for purity and quality.

F3 Erbslöh yeast production process - Fit for Fermentation

Our Oenoferm® yeast strains are fortified with minerals and vitamins during production using the Erbslöh F3 process. The yeasts thus ferment until fermentation is complete, even in stressful situations. The wine's aroma is purer and more incisive.

Dosage

We recommend adding 20 - 40 g Oenoferm® Structure to 100 L juice to obtain the optimum quantity of viable yeast cells. This ensures a good start of fermentation and dominance over the wild microorganisms.

It is worth adding the same quantity of Vita Drive biological yeast activator during the yeast rehydration phase to fortify the yeast at an early stage.

Depending on the nutritional situation in the juice, we recommend using yeast nutrients from the Vitamon® and VitaFerm® families.

Storage

Vacuum packed. Store in a cool, dry place. Packs which have been opened should be immediately tightly sealed and used within 2 - 3 days.
