

AUTOMATIC WIRE-HOODER, MINI VERSION, CAVEA 1500

The automatic Wire-hooder, MINI version, 2015A-2TR/10 model is the new entry of the OMBF's range of automatic wire-hooders. With its hourly throughput of 1500 bottles, it is the smallest of the range, designed to be inserted in low production bottling lines.

The model is completely manufactured in stainless steel, food-grade plastic materials, and steel alloys. All the machine components are easily accessible to facilitate cleaning and maintenance, so guaranteeing long term duration.

The machine is equipped with Safety guards and Certificate of conformity compliant to the EC regulations.
