

BEER MATURATION AND STORAGE TANK

ZBB Tanks are closed tanks for beer maturation and storage. They are made of high quality stainless steel. The tanks are equipped with manhole cover, a thermometer, a pressure regulator, safety valve, vacuum valve, spray ball, cooling jacket, insulation, drain and racking valves. On request, the tanks can be equipped with sight gauge and with fitting for carbonization stone. The position of the doors on the tank can be also selected. Outer finishing can be brushed (Scotch Brite) or circle polished. Operating pressure of ZBB tanks is up to 3 bars. Any dimensions other than listed in the table can be manufactured according to customer requirements.
