

COLUMN DISTILLER FOR FRUIT DISTILLATES WITH A CAPACITY OF 150 LITERS

Modern column still with a boiler capacity of 150 liters for the production of the highest quality fruit distillates, e.g. plum brandy, brandy, distillates from pome fruits - from apples, pears, etc.

This single unit consists of a boiler, which is a combination of stainless steel and copper. On top of the boiler, an aromatic column with 2 shelves is mounted, which contains the manufacturer's patented sieve plate and

filling system.

The "plug and play" still is the best starter alembic that requires minimal set-up time. Electric device (steam or gas options are also available).
