

CONICAL TANK

Conical tanks are made of stainless steel AISI304, BA (IIIId). They are ideal for the fermentation of beer and other liquids with sediments. Conical bottom 60° enables settling of yeast and sediments at the bottom of the tank. The bottom outlet is equipped with stainless steel ball valve 1", which allows easy cleaning and emptying. The tank is closed by a cover, that is sealed with a food-safe rubber.

Standard equipment:

- three welded legs
- bottom outlet - inox valve 1"

- inox tap 1/2"
- cover with seal
- cap (for airlock)

Volume (L)	ØD (mm)	h1 (mm)	h2 (mm)	h3 (mm)
50	398	350	700	80
100	476	500	700	80
150	476	750	700	80
200	476	1000	700	80
250	565	900	800	80
300	636	900	850	80
380	636	1100	850	80
