

HYDROPRESS LANCMAN 250 LITERS

Gross price:
11 583 €

Net price:
9 417 €

The highest quality juice presses made by Lancman - Gomark. They are easy to use and efficient. Pour ground fruit into the press, close the cover and connect the press to your garden hose. Using household water pressure, the rubber bladder expands outward, pressing the fruit evenly against the inner surface of the basket.

The pressure gauge allows for accurate monitoring during pressing. A pressure limiting valve allows for long, slow pressings. A pressure dump valve prevents over-pressurization.

Basic equipment:

- pressure regulator (1-4 bar) for automatic pressing (more in instructions of the press),
- additional plastic bag for protection at pressing (cover of the press),
- green filter net for easier pressing and emptying of the press,
- two fixed and two mobile transport wheels with a brake for easier moving of the press,
- tilling system for easier emptying of the press.

MODEL	CAPACITY OF THE PRESS [LITERS]	WORKING PRESSURE	DIMENSIONS [CM]	WEIGHT [KG]	PRESSURE REGULATION
VSP1X 55	55	3 bar	60x60x130	60	1-4 bara

VSPiX 80	80	3 bar	60×60×130	64	1-4 bara
VSPiX 120	120	3 bar	80×87×130	76	1-4 bara
VSPiX 170	170	2,5 bar	88×90×135	83	1-4 bara
VSPiX 250	250	2,5 bar	88×90×155	105	1-4 bara
