

MTO TANK, TANK CONTROLLER

- Measurement of one tank temperature by an industrial sensor
- Continuous accurate measurement of the level in the tank with an ultrasonic sensor
- Measurement of pressure in the tank
- Measurement of airflow (CO₂) and O₂ of the tank
- Control of electric valves for heating, cooling
- Control of electric valves of protective atmosphere (nitrogen, CO₂)
- Displays current values, setting the required parameters
- Mode changes
- Manual control
- Multilingual support
- Plastic box IP64, with multi-line alphanumeric display and foil keyboard
