

SEMI-AUTOMATIC MONOBLOC FOR BOTH CORKING AND WIRE-HOODING, CAVEABLOCK 800

This SEMI-AUTOMATIC MONOBLOC provides both corking and wire-hooding in a single machine. It can be used for bottling in glass containers with a diameter ranging from 55 to 115 mm and a maximum height of 375 mm.

The corker, made of stainless steel and equipped with safety guards, is suitable for the application of champagne corks and its target includes small and medium sized producers.

The wire-hooding machine is used for wire-hood distribution and closure. The following types of wire-hoods can be used: 4-POST WIRE-HOOD WITH CAP and 4-POST WIRE-HOOD WITHOUT CAP.

The 2003MS-TG/1 model is completely manufactured with stainless steel, food-grade plastic materials, and steel alloys. All components of the machine are accessible to facilitate cleaning and maintenance, so guaranteeing long term duration.

The machine is equipped with Safety guards and Certificate of conformity compliant to the EC regulations.

Capacity: up to 800 b/h.
