

SEMIAUTOMATIC LABELLING MACHINE FOR ROUND BOTTLES, MEGA

Bruttopreis:
22 413 €

Nettopreis:
18 222 €

MANUAL BENCH LABELER suitable for self-adhesive labels to be applied on cylindrical containers, equipped WITH ONE SINGLE LABELING STATION for dispensing the front label (or front and back labels with combo reels); it is also recommended for containers with low physical resistance to pressure, such as those in PET. Bottle blocking is achieved by a foam roller which also activates the labelling cycle. The machine is equipped with an electronic control panel and can store in memory up to 49 different programs for as many different containers. Container's manual positioning as standard, to be used for centering the packaging relative to a reference mark on the container (mark on the glass or spot on the foil).

- Possibility of labeling square or shaped formats.
- Possibility of labeling also small cylindrical formats, with a minimum diameter of 25 mm.
- Possibility of labeling hexagonal/octagonal jars with orientation.
- Possibility of applying wraparound labels.
- The machine can install the printer for marking the expiration date or the batch number.
