

STORAGE CONTAINER

The storage container is made of food-safe and UV-resistant PE material (natural colour without pigments) and is particularly thick-walled. This provides for maximum stability on the one hand and on the other preserves the aroma of the contents without alteration. This makes the container ideally suited for non-pressurized storage / fermentation of cider, wine, juice, water, cooking oil.

Continuous operating temperature max. 60

FOOD SAFE

Speidel transport containers are made of colourless and UV-resistant PE and thus comply with EU Regulation 1935/2004.

ROBUST

As is usual with Speidel, these containers are particularly thick-walled and therefore extremely robust.

CLEANING

The smooth inner surface ensures that the container is very easy to clean.

OUTLET

The outlet is at the lowest point of the container. Thus, complete emptying is possible. Both outlets with stainless steel bushing 1 1/4" IG.

BASE

The PE base is not only stable, it makes it easy for forklifts and pallet trucks to get under the container.

ADVANTAGES

- Food safe PE material
- Dome on the front side
- Screw cap 380 mm diameter with ventilation and venting
- Robust container
- Easy to clean due to smooth inner surface
- Completely emptyable due to bottom outlet bead
- Accessable base for forklifts and pallet trucks
- Fastening ouches for transoirt security with tensioning strap

Dimensions:

500 liters: height 141 cm, diameter: 88 cm

1000 liters: height 138 cm, diameter: 126 cm

1500 liters: height 186 cm, diameter: 126 cm
