

STORAGE STAINLESS TANKS

STAINLESS TANKS are used in wine-making operations, in food processing, gastronomical, pharmaceutical and chemical industries. The tanks are produced in many versions, shapes and cubic contents.

Stainless tanks are sorted in four basic groups according to their shapes, so we offer cylindrical, rectangular, rectangular in arch and elliptical tanks.

Tanks can be made with floating cover and as divided horizontally or as storable in piles.

Huge selection of accessories contains:

- hatches
- spherical valves
- flaps
- level gauges
- stirrers
- height adjustable legs
- thermometers etc.

Tanks are projected on customer request and demands.
